

Article 64. Trash Enclosures

All multiple-family, commercial or industrial structure(s) shall have a trash receptacle on the premises. The trash receptacle shall be of sufficient size to accommodate the trash generated on-site and shall be located so that it is readily assessable to collection agency vehicles. If a trash bin or dumpster is used it shall be screened by a 6 foot high solid masonry wall enclosure and a solid self-locking gate that are architecturally compatible with the main building. The gate shall be maintained in good working order and shall remain closed except when in use. All sides, excluding the gate side, visible from a public area shall be located in a landscaped area. For smaller businesses that utilize garbage cans or totes they shall be either located indoors or shall be screened from public view with material architecturally compatible with the main building.
