Capture, Analyze, and Deliver the Evidence

Revolutionary solutions to digitally capture the scene, analyze the data in 3D, and deliver impactful courtroom materials. Investigators and forensic experts around the world trust FARO® solutions to document the evidence at crime, crash, and fire scenes.

FARO Laser Scanners – The Future of Forensic Scene Capture

Capture**Analyze****Deliver**

Capture the Scene

There is never any doubt of missing critical evidence with a FARO 3D Laser Scanner because the entire scene is captured. Use laser scanning to capture millions of data points (called a 3D point cloud) at the scene or in the lab. This point cloud provides an accurate 3D representation of the evidence such as blood spatter, artifacts, skid marks, vehicle positions or charring patterns. Document all evidence in half the time it takes with traditional methods.
