

# Hello to the Future of Water

Your residence or place of business has been upgraded with a new digital cellular water meter encoder from the old radio-read dial register. This innovative new technology will allow the City – and our customers – to receive faster, more accurate information about water usage, leaks, and potential maintenance issues.

Your new cellular meter encoder puts the knowledge in your hands with up-to-the minute data collection delivered directly to you via a consumer engagement website and a smartphone/tablet app.

**To set up your account, please see  
the reverse side of this doorhanger or visit  
<https://eyeonwater.com/signup>**

***Say goodbye to uncertainty about  
your water consumption – and hello to  
the future of water management!***
